

# Population Density, Preliminary Release (2010)

## Gridded Population of the World, Version 4

**Persons/km<sup>2</sup>** 0 1-4 5-24 25-249 250-1,000 1,000 +

Gridded Population of the World, Version 4 (GPWv4) consists of estimates of human population for the years 2000, 2005, 2010, 2015, and 2020 by 30 arc-second grid cells (1 km<sup>2</sup>) and associated data sets circa 2010. A proportional allocation gridding algorithm, utilizing approximately 12.5 million national and sub-national administrative units, is used to assign population values to grid cells. The population density grid contains estimates of the number of persons per km<sup>2</sup>.
